

# Interview Guide

## The Regeneron STEM Superhero Challenge

If you are profiling someone you know who works in a STEM field, the following list of interview questions has been designed to help you get to know your hero better and to learn more about their career. You can use these questions as a starting point for your submission, but feel free to adjust them. The goal of your interview should be to gather inspiring stories and insights that will help to create a compelling profile of your hero for others to read. Tell us why they inspired you and what strategies for success they'd share with the next generation.

1. How did you first become interested in a career in STEM?
2. Tell me about what you do today and your path to get there?
3. What has been the most rewarding aspect of your career so far?
4. What challenges have you faced in your career and how did you overcome them?
5. What advice do you have for others who are considering a career in a STEM field?
6. What resources or programs were most helpful to you in your career development?
7. How do you think your work has made an impact in the STEM field and beyond?
8. How do you hope to inspire and support the next generation of STEM leaders?

Is there anything else you would like to share about yourself, your lessons learned, or about your hopes for the future?
