

# ACCEL

Advancing **C**limatetech & **C**lean **E**nergy **L**eaders

At **Browning the Green Space**, our mission is to increase the participation and leadership of Black and Brown people in the clean energy space and beyond.

At **Greentown Labs**, our mission is to build an inclusive community that convenes, connects, and inspires entrepreneurs and ecosystems to advance climate solutions.

ACCEL focuses on accelerating high growth, technological innovation-based startups that are led by people of color and women towards investment, partners, and first customers that help communities most impacted by climate change.

This program builds on elements of Greentown Labs' successful Launch accelerator program and Browning the Green Space's expertise in company building and supporting founders within disadvantaged communities.
