

# Cleantech San Diego for the Inclusive Energy Innovation Prize

## Our Mission:

Identify and target entrepreneurs and innovators from underrepresented groups raising awareness of the services and opportunities provided by Cleantech San Diego and the Southern California Energy Innovation Network and other organizations that support the commercialization of clean energy technologies.

Inform disadvantaged communities about career opportunities and paths within the expanding cleantech and renewable energy space and provide direct access to those opportunities.

Foster a collaborative ecosystem amongst community-based organizations that serve disadvantaged communities to increase the economic benefits of the cleantech sector for all.
