The Electric Island Vikings

Vinalhaven School District and Maine Clean Communities Electric School Bus Project

Vinalhaven School is partnering with Maine Clean Communities to purchase and operate a new all-electric Type C school bus. This zero-emission bus will operate on the island of Vinalhaven and transport students from elementary to high school. Maine Clean Communities will collect and present the bus data and leverage it to promote the use of all-electric heavy-duty vehicles in the State of Maine.
