

WATER, ENERGY and TECHNOLOGY CENTER

The Water, Energy and Technology (WET) Center at California State University, Fresno has successfully leveraged the California Central Valley's extensive resources to fulfill its **mission to support innovative water-, energy- and climate technology-focused entrepreneurs** on their paths to commercialization, while creating jobs and thriving businesses in the region.

Located in one of the most **impoverished counties** in California, the WET Center has substantial experience in working with **disadvantaged communities** and entrepreneurs from historically **underrepresented areas** and is aiding in the transition to a more **equal and just clean energy economy**.

WET CENTER TEAM

Committed and dedicated team with a unique combination of **innovation, economic development, business expertise** and **community engagement**. The team represents a **diverse blend** of cultural affiliations, ages and backgrounds, and is invested in **making a difference**.
