Student Testimonial:

"Soulful Synergy has changed my life! My knowledge of Climate Change is better than it has ever been before. The training programs have motivated me to be apart of the help that cuts down carbon emissions in our Earth. Soulful Synergy not only encouraged me when I was scared to publicly speak, or tried to figure out the career I want to pursue, but also treated me like family."
- Sarah Velez, recently hired as a Jr. Engineering Analyst at Kawi Energy Group
