

Title: Empowering Communities with Lamppost Charging

Team Name: Voltpost

Short Description: Voltpost retrofits lampposts into Level 2 charging stations managed by a mobile application. This enables quick installation to reduce the cost, timing, and footprint. Voltpost will increase electric vehicle adoption so cities achieve decarbonization targets. Voltpost consists of charging hardware, mobile application, and web dashboard. Our solution democratizes access to charging with the aim of improving environmental and health outcomes in an equitable manner.
