

Inclusive Energy Innovation Prize

U.S. DEPARTMENT OF ENERGY

The Journeyman Project

The best energy innovation we could bring to disadvantaged communities is an opportunity to become part of the energy workforce through hands-on education and real-life experiences. Not all students are book learners and not all entrepreneurs are engineers. We want to take individuals with potential and train them to at least a mid-stage caliber to support the energy workforce.

Video Pitch - <https://youtu.be/ioaQUB4H7ME>
