

Inclusive Energy Innovation Prize

U.S. DEPARTMENT OF ENERGY

Energy-Just Local Capacity Management Solutions

Cover Page: Impact Plan

Our team will define and integrate energy-justice and equity metrics in the design and evaluation of replicable local and sustainable peak-load management solutions to reduce inequalities. The team proposes to focus the activities in the Hyde Park neighborhood in Boston, MA, which has a large representation of low-income, minority and English isolated members of the community that most commonly experience energy-justice and equity issues.
