Intersection of Agriculture & Energy

"Gaia Box is a closed, hydroponic growing system combining various agricultural disciplines in one that can scale up and out, while also creating and storing renewable energy"

Renewable Energy & Food Insecurity:

Food insecurity and access to power where both of those issues have been less than favorable or available, specifically in urban, rural or less than optimal environments. Global warming, increasing population numbers, supply chain issues, and lack of infrastructure are the primary challenges that Gaia Box combats and enhances capability.
