

No-Investment Solar: Built by Local Communities, for Local Communities.

Urban Energy Inc.

Brooklyn, New York

Urban Energy is a solar developer and EPC specializing in rooftop solar installation on pre-war, low-moderate income multifamily buildings. Our “No-Investment” model allows us to offer fully financed rooftop solar to historically disadvantaged communities. In exchange for hosting our system on a building’s roof, we offer an annual “Solar Roof Lease” to building owners and a 10% discount on solar electricity to tenants. We recruit and train individuals from these same communities to install solar with well-paid jobs and ongoing opportunities for growth in the company.
