

Inclusive Energy Innovation & Entrepreneurship

The iris blooming through the frost is the symbol of resilience and of Prisere LLC. It is a powerful metaphor for the resilience of disadvantaged entrepreneurs and the beauty offered by their innovative capacity! Prisere has a vision of a safer, more resilient world. We want to empower other disadvantaged entrepreneurs to join our work.

Thanks to an SBIR (Small Business Innovation Research) award of the U.S. Department of Energy, Prisere's technology expands financial access to clean energy and climate resilience to disadvantaged communities for which such benefits might otherwise be out of reach.

Our next scope of work, which we propose for the Inclusive Energy Innovation Prize, is to expand access to climate technology and clean energy innovation and entrepreneurship; in effect, opening doors to others for the opportunity that we ourselves, as a disadvantaged small business, had enjoyed! Let's unlock the talent offered by disadvantaged entrepreneurs to innovate for climate and energy resilience by helping more Prisere-like start-up's to bloom and thrive!
