

SUSTAINIBLE VENTURE LAB

Sustainable is an economic development company with a mission to contribute to equitable economic and entrepreneurial growth by fostering the likelihood of business success.

Sustainable is applying to the Inclusive Energy Innovation Prize to create the Sustainable Venture Lab, a launching pad for student-led BIPOC-owned (Black and Indigenous People of Color) products and services that promote sustainability at their core. The lab will consist of capital access and entrepreneurial programming in sustainability and business development, producing an outcome of disadvantaged community representation in climate change mitigation. The founding team of Sustainable is below with a combined 12 years of experience in sustainability, technology innovation, economic development, entrepreneurship and teaching. The core team expands their capabilities through interns and council, totaling a team of ten.
