

Convect is on a mission to accelerate just and equitable home electrifications

The Problem...

Homes makes up **~20%** of **CO2** from the energy sector

Fossil fuels for heating/cooking have adverse health impacts

Slow adoption of hyper efficient appliances

Disadvantaged communities **can't afford** current financing options

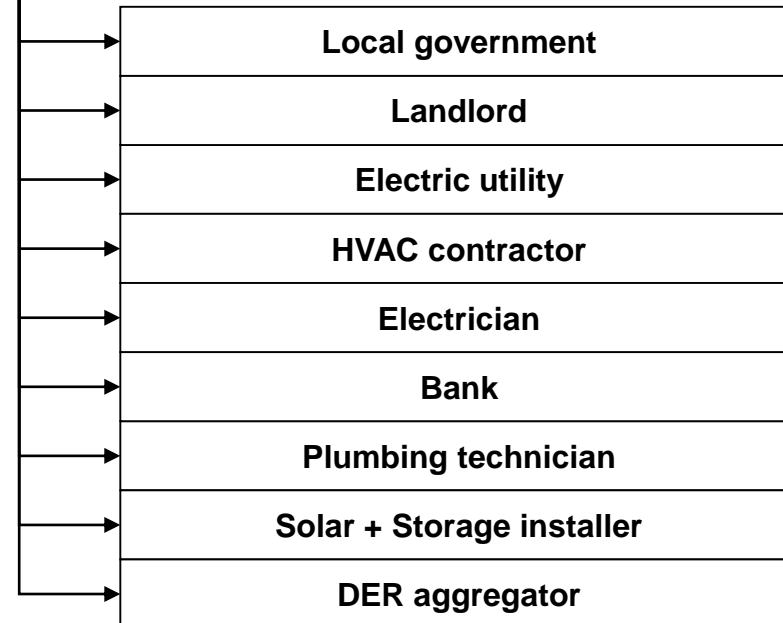

Cities and utilities **do not have strong net zero plans**

The Solution...

Convect

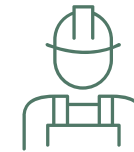

One-stop-shop for electrification planning, financing, installation, and monitoring

The 5-year Ambition...

~3,500 home electrifications complete

>17.5 tons of CO2e avoided each year

~70K person-hours of employment

>85M deployed to electrify homes
