

# Inclusive Energy Innovation Prize

## Team Evergreen Innovative Alliance

### Climate Healing and Commitment Program

Team EIA “Evergreen Innovative Alliance” was forged when multiple organizations decided to combine their efforts in advocacy and influential grassroots organizing to not only keep Washington State evergreen but to achieve a more equitable climate action in the state to reach a net-zero carbon reduction by 2030. With dozens of years of combined experience in the region’s premier climate technology accelerator, we seek to catalyze new opportunities for wealth creation through clean energy innovation for overburdened and underserved communities across the state.
