

*We will provide a cost-effective solution to the unreliable, fossil-fuel powered electric grid that is constraining Puerto Rico's rural economy and harming the quality of life in our mountain villages.* C.P. Smith, Founder & Executive Director Cooperativa Hidroeléctrica de la Montaña

- Bring solar + energy storage to essential businesses & community service centers in mountain villages of Puerto Rico.
- Ensure food, water, medical, educational, and communication service stay online during natural disasters and grid outages.
- Align affordable, reliable clean energy to community values to create lasting economic opportunity.
- Collect data to right-size microgrids systems. Power up demonstration sites. Invite participation and investment.

La Cooperativa  
Hidroeléctrica  
de la Montaña

Puerto Rico's 1st electric co-op. Provides resilient, cost-effective, renewable energy.

Accelerates Puerto Rico's energy transformation.  
Programs spur economic development, promote energy justice, and reduce poverty.

Advances climate solutions. Uses data to drive energy research, product development, system implementation, and policy change.
