

# Inclusive Energy Innovation Prize

U.S. DEPARTMENT OF ENERGY

## Truss Bridge Energy

*Actively developing the most comprehensive registry of black and brown owned land in the U.S. suitable for renewable energy development.*

Truss Bridge Energy (TBE) is a landowner centric minority owned energy development firm that focuses on the development of renewable energy projects on land owned by people of color, historically black colleges & institutions, and Hispanic-Serving Institutions.

Our mission is to promote socioeconomic and environmental justice while preserving and increasing black and brown land ownership by bridging the gap between the renewable energy industry and these historically overlooked and disadvantaged communities.
