

SCIENCE FIGHT CANCER

Discover New Cancer Treatments

Do you or someone you love have cancer?

We show you clinical trials in plain language and connect you to those best catered to you, all for free.

 I want to find trials for...

GO

What is Science Fight Cancer?

We connect patients with innovative cancer treatments.

Clinical Trials

Clinical Trials give patients access to new medical treatments for cancer. Patients give informed consent before they join a trial, and all trials must pass strict ethical standards.

Connect

So many cancer patients want to access clinical trials but don't know how to find them. At the same time, scientists have a hard time filling their trials, and important discoveries are delayed. Science Fight Cancer addresses this problem.

Clear Results

No dense medical language. We explain our suggested clinical trials to you in everyday language.

Our Team's Vision

Hillary Lin is a Stanford MD training to be an oncologist who also has interest and experience in digital health. Andrew Ow is a Stanford MBA and entrepreneur who founded a internet company whose products have tens of millions of users.

We are building a smoothly functioning and well-designed product to improve trial accrual, aiming to reach users as no other product in this space has done before. In this way, we will accelerate the discovery of new cancer treatments.
