10% of US buildings are > 50,000 sq. ft

\$5M

\$1M

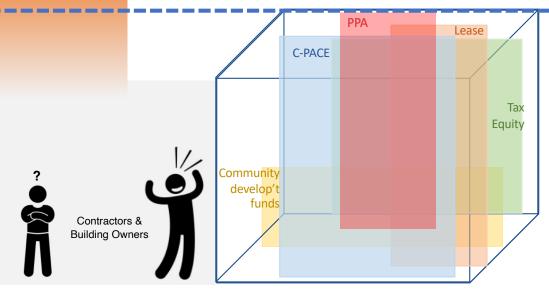

90% of US buildings will spend <\$5M in solar and efficiency improvements. Funders do not have the resources to engage that sector directly.

As projects get smaller, they get harder to finance SOLUTION 🔃

A financing ecosystem that caters to small/medium commercial building improvements

- Online, fast and easy
- · All financing mechanisms
- Open and competitive
- Free to use!
- Takes project from proposals to funding
- No cost to contractors.
