

# Pierre-Richard Presna's challenge details for challenge: [Solar Prize Round 6](#)

Generated at Sun Oct 02 2022 22:22:30 GMT-0400 (Eastern Daylight Time)

## Explanation

Currently, the company operates with one team member, the founder. As a startup, we lack the R&D and engineering resources to manufacture and scale our system to make it ready for market.

Those challenging financial times make it increasingly difficult to seek financial support and increase productivity. We are seeking technical assistance in R&D, design, and development to move our product from a proof-of-concept stage to a fully functional prototype to raise funding that will make it possible for us to hire the skilled full-time staff needed to run the company's daily operations; management team of sales, engineering, and marketing.

## Key Needs

- Technical Analysis (2 / 5): *No explanation*
