

Alexandros Charalambides's challenge details for challenge: [Solar Prize Round 6](#)

Generated at Tue Oct 04 2022 17:49:42 GMT-0400 (Eastern Daylight Time)

Explanation

API Connectivity to PV Inverters , Real time PV Data , Cloud computing

Key Needs

- Testing and Validation (4 / 5): We would like PV data from the US to validate our predictive models
- Utility Scale (5 / 5): We need to be able to integrate our solution to existing grid operators
- Funding & Investments (5 / 5): Corporate Investment will be needed to be able to form alliances to roll out our software in the near future.
- Software Development (2 / 5): A senior Software Engineer is part of the team, but further help is needed.

Matches

1. [Dynamhex Inc.](#): 82.81%
