

# Prometheus Innovations, LLC's challenge details

## for challenge: [Solar Prize Round 6](#)

Generated at Tue Oct 04 2022 22:14:30 GMT-0500 (Central Daylight Time)

### Explanation

Our key needs will be in composite HDPE polymer molding and fabrication for the module frame work of our PV generations system as well a a low power ultrasonics innervation system for module cleaning .

### Key Needs

- Manufacturing (5 / 5): Polymer molding and mixing capacity to build the module structure is a key component that we do not have in house.
- Fabrication & Prototyping (4 / 5): fabrication and prototyping of the ultrasonic transducer embedment and frequency determination for air innervation for cleaning.

### Matches

1. [GoSun](#): 87.69%
2. [For ClimateTech \(powered by NYSERDA\)](#): 87.64%
3. [Larta Institute](#): 87.62%
4. [Rosenblad Design Group](#): 87.61%
5. [Georgia Institute of Technology](#): 87.61%
6. [D2Solar](#): 87.50%
7. [mHUB](#): 87.50%
8. [Solar Inventions](#): 87.50%
9. [Vertex 3D Design](#): 87.50%
10. [Windings, Inc.](#): 87.50%
