

SOLOSOLAR

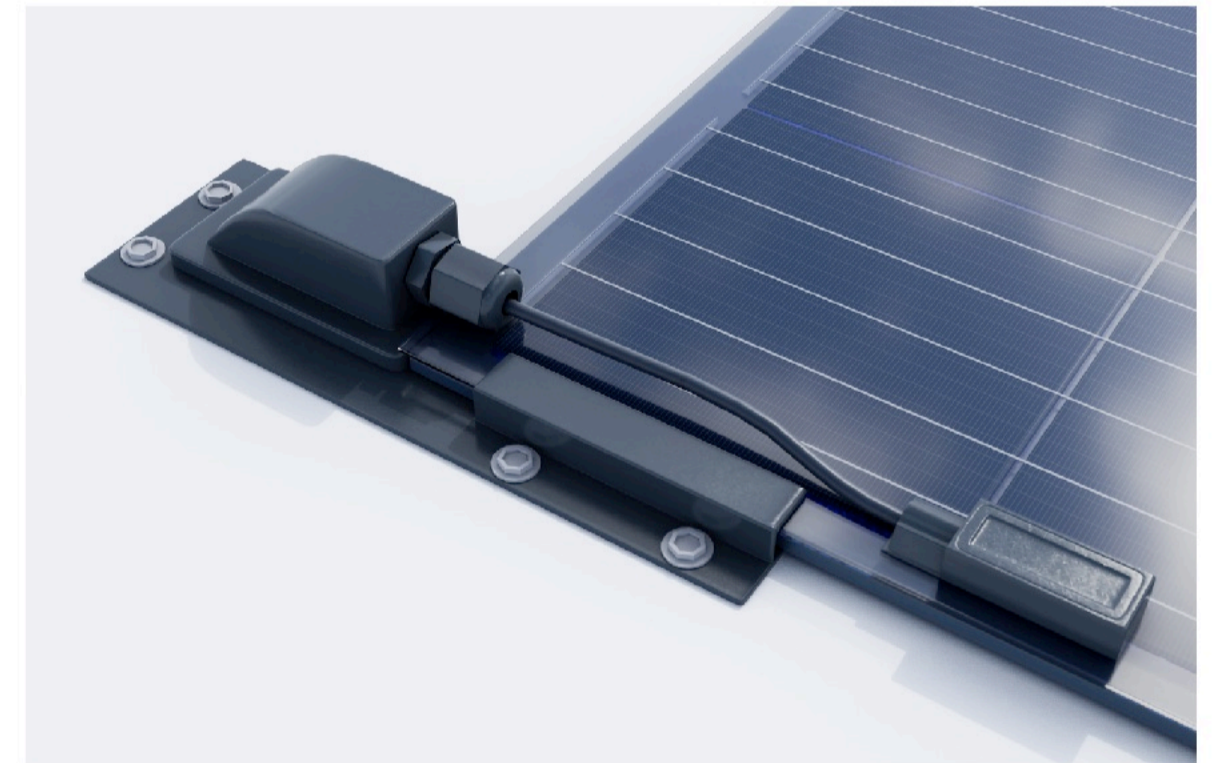

Making residential solar accessible to everyone!

Cell configuration to have MC4 connectors at corners of module.

Top panel mounting plate has attic run box so MC4 leads can go directly into attic and connect to Micro Inverter. Every mounting plate on module has 2 lags and 4 on top panel as well as butyl layer for flashing penetrations. Can be deck mounted.

Frameless modules with integrated racking and MC4 connectors on top.

Our all inclusive minimal design cuts material and installation time and cost while being the most asthetically pleasing panels. Each kit can be installed in under 15 minutes and plugged in powering the home immedietly which is why unlike other plug & play solar kits ours truly live up to the name Plug & Power™. No electrical work or permits needed making them as easy to install as putting Ikea furniture together.
