challenge: [Solar Prize Round 6](#)

Generated at Wed Oct 05 2022 23:22:47 GMT-0700 (PDT)

Explanation

Hello, American Made Network . My name is Aaron Jacobson . I am part of Team SecuredSolar . Our solution is fully developed and getting ready to hit the market . However , there are a few areas where we could benefit from aid within the American Made Network , including the areas of Legal, Insurance and Public Policy, Funding /Investments , and Manufacturing . Any support we can receive we would be highly grateful for

Key Needs

- Legal, Insurance, and Public Policy (5 / 5): I am selecting a 5 out of 5 for legal, insurance, and public policy as our solution is a safety product that will be used to eliminate a potentially life-threatening hazard for first responders . Having additional advice on what type of insurance could be used to help protect our product and business would be beneficial. Additionally, access to legal resources to help draft agreements within our business as we progress is essential.
- Funding & Investments (5 / 5): I am selecting funding and investment as 5 out of 5 on the importance scale. As our product may require numerous product demonstrations , further product testing, and many giveaway trial units to gain orders from our customers . Funding these outcomes could be costly. So having someone from the American Made Network help us find additional funding to support these events would be highly beneficial.
- Manufacturing (3 / 5): I am selecting a 3 out of 5 for manufacturing as our company has created our own production line and currently has a modest space for product manufacturing ; however, if we scale at a swift pace due to market demand. We could potentially use help in securing a more prominent space than we have now.
