

An eco-friendly, self-sustained musical instrument solely powered by the sun, Solar Guitar is a unique educational/commercial product and the natural reflection of the global solar energy revolution: <https://patents.google.com/patent/US9905213B2/en>

JUSTLANDED Solar LLC is looking for creative partners to optimize Solar Guitar prototype for manufacturing by upgrading the panel-battery efficiency parameters, charge/battery monitoring, electrical diagram, amplifier/processor, etc. The voltage, current, and power of the electricity generated by the Solar Guitar solar modules have to be perfectly allied to the built-in storage battery specifications in order to guarantee a fast and reliable charge. Solar Guitar's power battery output is projected in a range between 5V and 24V.
