

Jeremy Elan Trilling's challenge details for challenge: [Solar Prize Round 6](#)

Generated at Thu Oct 06 2022 09:18:29 GMT-0400 (Eastern Daylight Time)

Explanation

At Toolbus.tech, we empower boundless creative freedom using mobile solar-powered innovation studios. To broaden our outreach, we are excited to pursue growing our fleet with the use of electric school buses as base vehicles. In addition, we are looking for partners to supply equipment, housed within the vehicles, used to inspire and enable design and fabrication of awesome projects!

Key Needs

- Manufacturing (3 / 5): We have manufacturing equipment for our prototype unit but will need more equipment for subsequent vehicles.
- Funding & Investments (5 / 5): We have a pilot vehicle to begin our program with and will need funding to envision its operations and to grow the fleet of vehicles to realize our goal of equitable technical education.
- Fabrication & Prototyping (4 / 5): We have manufactured our prototype unit and will need to develop fabrication of the vehicles once we grow the fleet.
- Robotics (3 / 5): We have Robot arms for our prototype unit but will need more equipment for subsequent vehicles.
- Marketing & Promotion (4 / 5): We would be delighted to broaden our impact through bringing ToolBus to where it would be needed most!
- Strategy (5 / 5): We would love to answer - Can this concept scale to create real impact?
