

Streetleaf Solar Streetlights

Clean Green Lighting Machine!

THE SOLUTION

Streetleaf proposes a solar and battery powered streetlight that is capable of lighting any street, anywhere

Problem

- Outdoor lighting accounts for \$10 Billion in energy costs annually
- Streetlights are the most significant expense for most cities
- There are a reduced number of streetlights impacting public safety in underserved communities

Achievements

- Deployed over 3,200 100% solar powered streetlights
- 50+ customer contracts executed
- Only system with Electric Utility Customers
