Rob Lockhart's challenge details for challenge:

[Solar Prize Round 6](#)

Generated at Thu Oct 06 2022 14:09:15 GMT-0400 (Eastern Daylight Time)

Explanation

We provide services PV project quality assurance and would like to develop a software tool to provide to developers and installers to aid in QA/QC activities .

Key Needs

- Software Development (5 / 5): We have deep experience in PV quality assurance but little experience in developing a software tool.
- Funding & Investments (4 / 5): We have developed solid methodologies in performing PV quality inspections, testing, and PV system commissioning . We are looking to develop a software tool to help the ever growing solar workforce scale while maintaining or improving quality.
