

**PowerHouse** is a plug-and-play, mobile solar microgrid. It features bi-axial tracking for an effective 4kW solar array, is fully scalable, and delivered ready to use from on-board inverters or to be tied to the grid, and with aesthetic options to match the property.

**It's solar, in a box.**

### OUR MISSION-

*Opening new fronts in the fight against climate change through tactical deployment solutions for renewables*

## THE PLATFORM

- Modular mechanical system
- Automated, remote, manual operation
- Aesthetic Options
- Platform for
  - Commercial
  - Governmental
  - Residential
