

U.S. DEPARTMENT OF ENERGY

# American-Made Solar Prize Round 6 Ready! Contest Submission

**Project Name:** High Efficiency Omnipresent Solar  
**Innovation tagline:** to massively deploy high-efficiency solar panels that can nicely fit in the environment without obtrusive black colors

**Keyword tags:** *BIPV, Si heterojunction solar cells, lifetime durability*

We would like to request Technical Assistance through the network, only when we are able to win the Ready award; the need will be to find partners to help scale up our manufacturing technology.
