

The Baytown Area Solar for Schools Coalition

SHINE Development Partners | Chinquapin Preparatory School | Baytown-West Chambers County Economic Development Foundation

“Serving minority and disadvantaged communities in the Baytown Area through green energy technology access for schools and nonprofits.”

Being awarded the Department of Energy’s Community Clean Energy Coalition grant will allow us to immediately move forward with deploying solar systems in the community, offsetting our need for fossil fuels and countering the harmful impact of multiple chemical facilities and natural gas-powered plants in the area. This will directly help those we serve who fall into the 96th percentile of disadvantaged communities, 100th percentile for cancer risk, 98th percentile for Superfund Site National Priority List proximity, and 96th percentile for Climate Hazards Loss of Life estimates.

Our Goals For the Department of Energy’s Community Clean Energy Coalition Grant

Provide clean energy technology access, such as solar power, in the Baytown Area

Decrease harmful air pollutants and related health risks within the Baytown Area

Increase clean energy enterprise creation and contracting for minority businesses in the Baytown Area
