Truss Bridge Market Opportunity

- Our Research suggests there is +2MM acres of agricultural land owned by our targeted customers
- Our goal is to identify 10% of this land for development (i.e., 200k acres)
- Conservatively, that's sufficient land to develop 40GWs

Utilizing industry standard market lease rates would inject \$200MM/yr. into our targeted communities and in excess of \$5B over the life of our projects

Our Research (i)M孠 \mathfrak{M} 1 million acres Non-Farmers **Energy Land** Matching Owner Registry can help energy USDA estimate of Land owners with development by adding an Minority owned and Increases minority energy development registered farm land additional 1 million acres energy participation in opportunities clean energy
