

NOLA CLEAN ENERGY COLLECTIVE

Clean Energy Awareness through Art

- Xavier University of Louisiana’s FPM Office of Sustainability, XULA Green
- Alliance for Affordable Energy
- Hammond Northshore Jack and Jill

KEY GOAL:

To utilize art to prepare underserved communities, K-12 students and HBCU students with tools to decrease their carbon footprint while learning about clean energy activists and resources, clean energy types, and the importance of clean energy usage

By introducing concepts of clean energy to youth, we seek to not only increase their knowledge of, engagement in and adoption of the benefits of clean energy but also possibly prevent the worst impacts of global warming and secure our future.

Coalition’s Justice40 Policy Priority

Focus:

3. Increase parity in clean energy technology access and adoption in disadvantaged communities

6. Increase clean energy jobs, job pipelines, and job training for individuals from disadvantaged communities

8. Increase energy democracy (stakeholder engagement to facilitate decision-making) in disadvantaged communities
