

THE LIVE BIG COALITION

Implementing clean energy and sustainable solutions in Southeast Louisiana.

What are we? We're the Live Big Coalition, a group of grassroots organizations in Southeast Louisiana working at the intersection of resource management, clean energy, sustainable living, and community development.

- **Live Big Louisiana is a civic engagement platform** to engage Southeast Louisiana residents to promote economic development, lay the foundation for a sustainable Gulf Coast, galvanize young voters, and change the messaging around what it means to live in Louisiana.
- **RealCycle is a resource management company** helping New Orleanians to implement real recycling solutions and sustainable strategies in partnership with the New Orleans Jazz and Heritage Festival.
- **Get Lit Stay Lit is an initiative of Feed the Second Line**, a non-profit organization dedicated to supporting the culture bearers of New Orleans to build a more equitable city, outfitting neighborhood restaurants with microgrids to create hubs in the wake of hurricanes
- **Glass Half Full is a grassroots glass recycling organization** in New Orleans, recycling Louisiana's glass "waste" into sand and glass cullet for disaster relief
- **GlassRoots is a 501(c)(3) tax-exempt organization** geared toward expanding access to recycling through educational opportunities and partnering directly with communities to ensure the services of Glass Half Full benefit residents and the environments they live in.
