

ScaLaDE (Scalable Labeling for Data Enrichment)

DOE American Made – Digitizing Utilities Prize

Mighty knight pursuing Value from Data

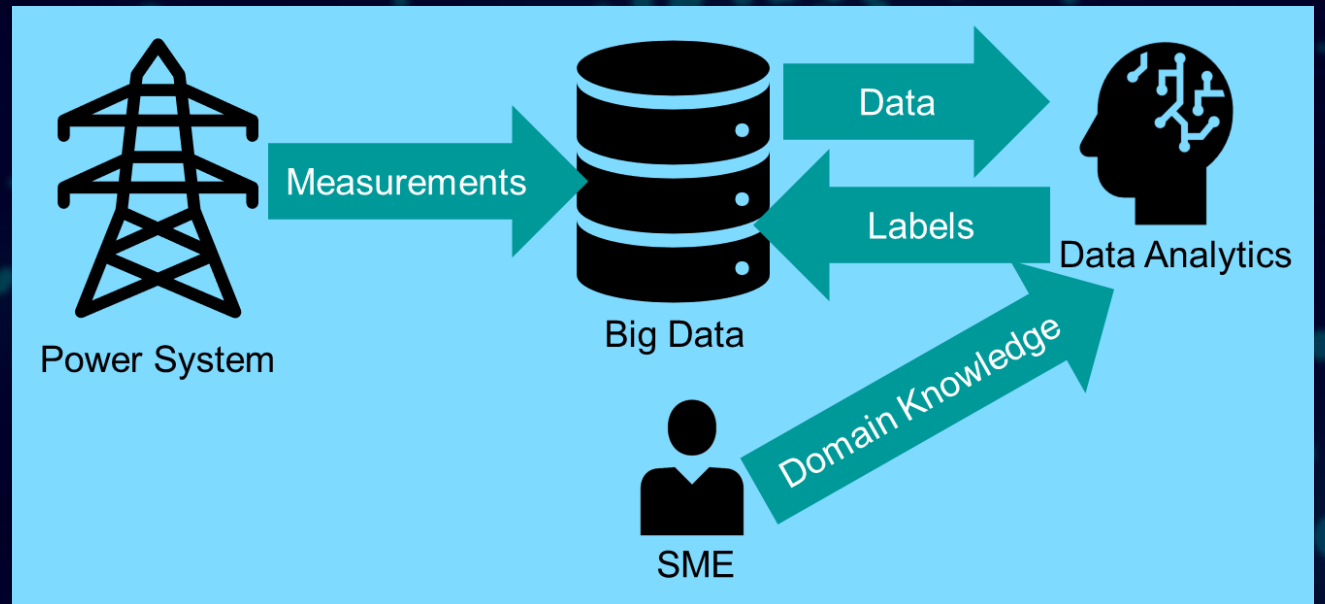

Lack of Labels Castle Walls

ScaLaDE

Value Extracted from Data lies behind them

Employing Machine Learning to make the best use of the available domain knowledge from SMEs with the goal of enriching large datasets with label information

Key project members

- Bruno P. Leao: Siemens Technology U.S.
- Jianhui Wang: Southern Methodist University

Key previous work: MindSynchro (DOE FOA 1861)
