

PingThings

PingThings is the world's fastest, nanosecond-precise, time series analysis and AI platform for managing, analyzing, and learning from sensor data at any resolution.

PredictiveGrid supports:

- SCADA
- DFR
- AMI
- Synchrophasor
- Continuous point-on-wave
- Other time-series or metadata

With proven deployments at Dominion Energy, Consolidated Edison, Ameren, and more.

Access and query sensor data at up to 1 billion samples/second/stream as well as the ability to capture and access supporting data for grid analysis, topology and velocities of Time Series Data, and Sensor Metadata
