

Oklahoma City Public Schools - Moving Toward More Sustainable Schools in OKC

OKCPS recently established a new Energy Conservation Department and Energy Specialists are embedded onsite to provide facilities staff with bandwidth to micro-manage the health and comfort of District buildings. We help them understand how energy is consumed and reduce waste.. We would like to expand our knowledge to create subject matter experts with outside resources and training to expedite specialist capabilities.

PROPOSED FACILITIES TO BE ADDRESSED

<p>Cleveland Elementary Built: 1928 (95 years) Total students served: 437 Economically Disadvantaged: 62.7%</p>	<p>Thelma Parks Elementary Built: 1997 (26 years) Total students served: 524 Economically Disadvantaged: 93.1%</p>	<p>Jefferson Middle Built: 1960 (63 years) Total students served: 900 Economically Disadvantaged: 92.2%</p>	<p>John Marshall Middle Built: 1961 (62 years) Total students served: 761 Economically Disadvantaged: 91.0%</p>	<p>Mary Golda Ross Middle Built: 1930 (93 years) Total students served: 931 Economically Disadvantaged: 95.7%</p>

The CLASS Prize is a great opportunity to educate and train certain key LEA to expand knowledge and implement ideas and technology to current everyday use. The training received through the CLASS program will be applied to Operations resources and School site locations. We would like to increase the amount of knowledgeable individuals and expand awareness to create a District wide Energy Conservation culture.

OKCPS ENERGY CHAMPIONS TEAM
