

NOLA Public Schools for Orleans Parish School Board

Need/Challenge

NOLA Public Schools (NOLA-PS) will submit for the Renew America's Schools Grant to use funding for several of our schools to have better air quality and be more energy efficient with respect to our 10 year school assessment plan. We currently do not have staff that can address energy management of our schools but are committed to bettering our schools for our students.

Impact

Energy CLASS Prize monies would allow NOLA-PS to train our Energy Champion(s) to manage and maintain our school infrastructure for maximum energy efficiency. This will also allow precious finite funding to go toward other necessities for our schools.

Energy Champion

NOLA-PS is currently in the process of selecting an Energy Management Consultant through a publicly bid Request for Qualifications, who will also become our Energy Champion. The Energy Champion will take the newly gained knowledge to coach district staff on energy management skills of their schools.

Proposed Facilities
