

# Energy CLASS Prize Broward County Public Schools – Summary Slide

**Need/Challenge:** In order to leverage industry expertise in the areas of facility energy and health improvements, training for the Local Education Agency is outsourced, adding additional strain to the managing department's (Environmental Health & Safety Department's, EH&S) internal budget. As current learning opportunities are limited and costly and above the district's capacity to fund, coaching and educational courses and training will provide EH&S the capacity to build staff's industry-specific knowledge.

**Impact:** The Energy Class Prize will provide the LEA significant resources to offer staff training to improve their skill set in effectively planning for and implementing proposed energy and health improvements in schools.

## Team/Proposed Energy Champion(s):

Energy Champions:
Eloy Quesada   Project Manager III, Energy Conservation & Utility Management   P: 754-321-4212
James M. Bowen   Project Coordinator   P: 754-321-4200
