

EAST RANGE ACADEMY of TECHNOLOGY AND SCIENCE

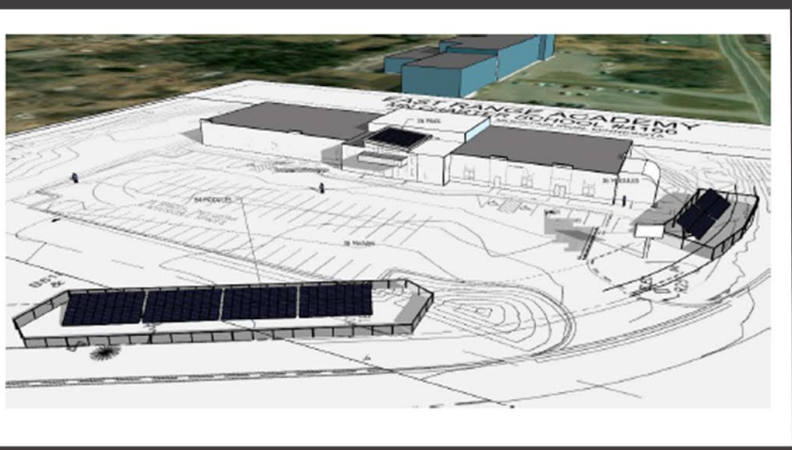

Mt. Iron, Minnesota

East Range Academy
of Technology and Science

Our current output:
Solar array -- 68 kW
Geothermal -- 73kBTU
That means 1,202
pounds of carbon will
not be released today

We want to make our school a net zero carbon school and celebrate it to our students and our community.

Plans are in place for a 75kW solar array and 600k BTU geothermal system.

Our Energy champions

Jay Bree

Max Shane

We need training in project management and fundraising to make it happen.
