

Planned Portfolio

- ❖ **Each project meets the 5 meaningful benefits**
- ❖ **Pueblo of Jemez, NM:** 1.8MW of community solar (CS) and in the pre-development phase
 - ❖ **Cochiti Pueblo, NM:** 5MW of CS and economic development project, and in the interconnection process
 - ❖ **Zia Pueblo, NM:** 5MW solar farm, with behind-the-meter opportunities and in the planning phase.
- ❖ **Potential for up to 30MW of CS with up to half a dozen tribes in NM.**

5 Meaningful Benefits

- ❖ **100% LMI focus**, with historically underserved Tribes in NM
- ❖ **Greater savings on household utility bills**, and tracked relevant data with Tribes
 - ❖ **Increased resilience and grid benefits** through CS, grid efficient buildings (GEBs), and utility-level energy management information systems
- ❖ **Community ownership** option provided to each hosting Tribal Nation
- ❖ **Equitable workforce development** through ICAST's GC2 workforce program and economic planning to serve disadvantaged residents in the community
