

The mission of the Cooperative is to deliver a just and equitable energy transition for our members and broader community through direct participation and ownership in our shared energy infrastructure and services.

| | Community Originated | Community Developed | Community Managed | Community Owned | Community Benefits |
|-------------------------|----------------------|---------------------|-------------------|-----------------|--------------------|
| Investor Owned | no | no | no | no | None |
| Community Participation | yes | no | no | no | Some |
| Community Partnership | yes | yes | yes | Within 10 years | Significant |
| Community Owned | yes | yes | yes | yes | All |

New Mexico People's Energy Cooperative puts the Community into community solar in a deep and meaningful way that will realize the **maximum potential community benefits**. By engaging our subscribers as member-owners, we create a **pathway to shared wealth and control** of our projects with our entire community. The membership, structure, and **democratic principles** of NMPEC as a cooperative business ensure long-term beneficial community impacts as defined by the communities themselves.
