

Community Led Community Owned Solar

Energy Allies revolutionizes the energy system by centering climate-impacted communities through clean energy projects, policy advocacy, and education.

Our approach to project development:

- Let local stakeholders lead
- Follow a Community Benefits Plan
- All decisions are made by an active Community Advisory Board via ranked choice voting
- Establish the Boston Community Solar Cooperative to expand ownership opportunities
- Adhere to diverse hiring practices
- Prioritize climate-impacted communities at all stages

Portfolio Snapshot

3.56 MW of planned projects in environmental justice neighborhoods across Boston

Finalizing predevelopment for a cooperatively owned array in Dorchester, MA

Working with mission-oriented land owners to lease roof/parking space to build arrays

Extensive organizational experience studying best practices to increase LMI access to community solar
