

Amp Energy Community Solar

About Us

Amp is an experienced solar and storage developer and owner with a growing portfolio of community solar projects across the country.

Our Community Solar Portfolio

27 operating projects in MA, MN, and NY
13,000+ homes powered
74,000+ tons of CO2 reduced

Our Community Power Accelerator Portfolio

Falmouth, MA

Amp is developing a community solar project in Falmouth, MA at the site of a former country club. The project will offer local environmental benefits, help strengthen the grid with an onsite battery storage system, and provide numerous direct benefits to subscribers and the community.

McLean County, IL

Amp is developing a community solar project at the site of a former railway bed near Bloomington, IL. The project will create high-quality jobs, offer savings for subscribers, and provide direct benefits for the local community.
