Deliver significant co-benefits to farm communities

Utility + CCA partnerships

Implement PUC program for significant bill reductions

Site projects specifically in DACs

Solar + Storage

Add value to wholesale community solar energy sales

Bring resilience to local grids

Who we are

Ventura Energy is a small, woman-owned **solar developer** based on the **Central Coast of California** seeking to deliver energy services with **abundant, local benefits** to our communities, prioritizing the needs of low-income and/or disadvantaged communities. Our team shares a strong sense of **connection** with our Central Coast communities and a willingness to **innovate** to deliver on the promises of community solar.
