

Thistle Whistle Farm + Innovative Community Agrivoltaics

- Up to 2 MW across three community-scaled and community-owned agrivoltaic projects, integrating established and new agricultural enterprise with clean energy production.
- Centered in a prized agricultural region in transition from a coal-mining past.
- Projects owned by small farmers, farm-related businesses, area nonprofits, and residents who would otherwise be unlikely to acquire solar.
- Projects led by community-rooted team of agricultural, solar, and nonprofit professionals.
- Innovative greenhouse project would also facilitate clean-up of coal-mine waste methane and help remediate a former mine site.
