

# FULL SERVICE SOLAR

Full Service Solar LLC is a New York City based, minority owned, turn-key, solar energy provider focused on accelerating the transition towards an equitable, low carbon future. We strive to deploy community solar in cities across the country to empower residents from disadvantaged communities to overcome the following hurdles preventing them from participating in the clean energy economy

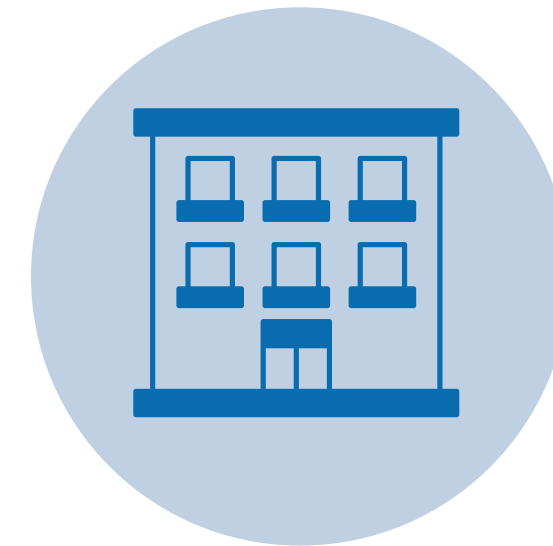

The cost of solar has declined significantly over the past decade but is still out of reach for most residents in disadvantaged communities.

Access to capital and financing is not within reach for low to moderate income customers

Disadvantaged communities have higher % of renters vs. owners  
Full Service Solar will empower renters to participate via community solar

Disadvantaged communities tend to have a larger concentration of multifamily buildings and buildings limited by shading issues
