

# Texas Responsible Energy & Efficiency, Inc.(TREE)

## Capability Statement

It is our mission at TREE to empower people and organizations with sustainable, renewable energy, in an equitable way. We believe intentional action is required to accomplish the global sustainable development goals, and we can start by empowering the communities we serve. We accomplish this as a solar design engineering and installation company, providing commercial and residential photovoltaic (PV) solar systems.

---

# Texas Responsible Energy & Efficiency, Inc. Capability Statement

**TREE is excellent at designing grid-tied and off-grid solar systems with battery storage. We can design and install solar for your home, business, new real estate development, school district, or an agricultural system (greenhouse, hydroponics, aquaponics, etc.). TREE can also design and install solar-powered EV charging stations.**

- Over 13 years in business
- Efficient, quality work at a fair price
- Hundreds of residential and commercial solar systems designed and installed
- NABCEP Certified Installation, with a combined 25+ years experience
- Battery Storage options for Energy Security
- Certified Compliance Administrator for publicly funded energy projects with labor and contract compliance reporting requirements

## NAICS Codes
