

# Letter of Purpose

Community Power Accelerator Competition Organizers,

This wonderful church (New Mt. Hermon Baptist Church) and its leadership came to our team over a year ago emphatic about installing solar and being a true champion for environmental and energy justice. We are submitting their project as the first step in our plan to develop a multitude of BIPOC and LMI facilities and homes.

We were inspired so much that we are on schedule to complete our funding stack for this project and a few more in the next few months. We want to make our communities energy resilient, free of pollution, generate jobs and give the youth something to aspire to that they can see and touch. Our step into the Solar Developer role could have not happened without the bravery and leadership of Pastor Alex Hill, Deacon Moore and so many other community leaders.
