

FLAME TANGAGER TOOLKIT

EACH TOOL SAVES AIRPORTS MONEY!!

Version 1 Summary

- After working with NREL and planning to rebuild Puerto Rico's grid to be climate resilient, we built a toolkit to help airports save money and decrease emissions
- Using our internal research and public renewable data, we provide clean energy options for each airports depending on their geography.
- Minimizes capital expenditures by combining state, local, and federal renewable energy incentives.
- Microgrid Sizing Tool connects you to a variety of storage options.
- *Adding green hydrogen and metering tools soon.*
